

WEIJIA LU

A chief researcher with **two PhDs** and senior manager of an innovative team of diverse technical directions;
Over **20 years** of experiences in healthcare and automotive;
Has demonstrated excellence in **AI, multiphysics numerical analysis, signal processing** and likely.

CERTIFICATES

- 👤 JHU certified Data Science Specialization
- 👤 Bk certified Big Data Analysis with Spark
- 👤 GE certified Green Belt of Lean Six Sigma
- 👤 CN Automation certified Mid-Class Eng

WORK HISTORY

📅 08/2019 - Now

📍 UAES, CN

Chief AI Scientist & Sr. Mgr

📅 09/2018 - 08/2019

📍 Tencent AI Lab, CN

Senior Researcher

📅 04/2017 - 09/2018

📍 GE Digital, CN

Staff Data Scientist

📅 05/2012 - 04/2017

📍 GE Global Research, CN

Lead Engineer

📅 09/2010 - 05/2012

📍 Phillips Research, CN

Scientist

📅 09/2003 - 01/2004

📍 Baokang Electronic Control, CN

Hardware Engineer

EDUCATION

📅 05/2008 - 09/2011

📍 University of Aizu, JP

PhD of Computer Science

📅 09/2004 - 06/2009

📍 Fudan University, CN

PhD of Electronic Engineering

📅 09/1999 - 07/2003

📍 Nanjing University of Sc. and Tec., CN

BSc of Electronic Engineering

ACHIEVEMENTS, HONOURS AND AWARDS

- 🏆 CTO Physical & Digital Integration Award, GE, 2016
- 🏆 Best Employee, UAES, 2020
- 🏆 1st prize of CMQMA Excellent Quality Management, CN, 2022
- 🏆 Pearl Engineer, Pudong Shanghai, 2024

RECOMMENDATIONS

"..Weijia has developed an excellent reputation within our organization as a dedicated, insightful and easy to work with colleague..." - by Chief Engineer @ GE US Probes

FEATURED PUBLICATIONS

30+ papers, 60+ patents, those with following symbols are recommended: (♣) Software implementation and algorithm; (♠) Signal Processing, deep/machine learning and computer architecture, AI for control, plant modeling; (♥) Physics and computational modeling; (♢) Optimization algorithm and operational research

Weijia's research can be broadly divided into the following stages:

2007–2011: Specialized in medical electrophysiology research, investigating arrhythmia detection and mechanisms through hardware system design, software development, time-series signal processing algorithms, and computer simulation. Simulations encompassed cell transmembrane potential models, Huygens propagation models, and electric field simulation using the boundary element method.

2011–2018: Expanded research to medical, oil & gas, and other sectors, applying signal processing and computer simulation to address industry-specific challenges. Signal processing evolved from 1D time-series signals to 2D ultrasound images, while simulations extended from electric fields to acoustic fields, fluid-structure coupling, acoustic radiation computation, medium attenuation, and ultrasound imaging. With TensorFlow's emergence, AI was adopted for electrophysiological signal processing starting in 2016.

2018–2019: Focused on AI-driven analysis of medical pathology images, including instance segmentation, cancer grading based on segmentation results, and prognosis assessment from histopathological images.

2019–Present: Leading a team dedicated to solving critical automotive industry challenges with AI, thus provides direct product augmentation. e.g. computer vision for industrial manufacturing, optimization algorithms for accelerated calibration, AI+information security, smart sensor development, AI+control systems, plant modeling, and federated training.

2023–Present: With the advent of large models, leading team to build AI agents and company-wide ChatBots. Research contributions focus on information retrieval, large model inference, ontology, and knowledge engineering.

Design and Implementation of a New System for Whole-Atrial Epicardial Mapping

👤 Cuiwei Yang, **Weijia Lu**, Xiaomei Wu, and Zuxiang Fang

📅 2007 📖 International Journal of Bioelectromagnetism (IJB)

About: A generative adversarial network to detect intrusion on vehicle gateway. AI for Vehicle Safety. A generative adversarial network to detect intrusion on vehicle gateway. AI for Vehicle Safety.

Knock detection method and device for PCSP ignition strategy (♠)

👤 Xiaofeng Ma, **Weijia Lu**, Gang Xi and Jianqiang Wang

📅 2022 📖 CN 114781425 B

🔗 [Link](#)

About: A new knock detection method when traditional algorithm failed on PCSP ignition strategy. This method deal with labeling noise by cross training and carefully designed hand-crafted features. AI for Smart Sensor. A new knock detection method when traditional algorithm failed on PCSP ignition strategy. This method deal with labeling noise by cross training and carefully designed hand-crafted features. AI for Smart Sensor.

Gradient-Based Meta-Learning Using Uncertainty to Weigh Loss for Few-Shot Learning

👤 Lin Ding, Wenfeng Shen, **Weijia Lu**, Peng Liu and Shengbo Chen

📅 2023 📖 in Proceedings of ICCECE

🔗 [Link](#)

Towards Designing an Attentive Deep Trajectory Predictor Based on Bluetooth Low Energy Signal (♠♠♠)

👤 **Weijia Lu**, Xiaofeng Ma, Xiaodong Zhang, Zhifei Yang and Qinghua Wang

📅 2023 📖 in Proceedings of 57th Annual Conference on Information Sciences and Systems (CISS)

🔗 [Link](#)

About: A small but carefully designed MOE network to predict cellphone location in a key-less entry scenario. The deep learning network, with only 700 floating parameters, has been deployed in a ECU with 300MHz frequency and limited code segment. This network has two branches, one to predict the angle and another one for radial distance, and whole network is sparse activated. Moreover a carefully designed loss function is reported in this study to accelerate network training. AI for Smart Sensor.

Distributed Training Methods and Systems for Models (♠♠)

 Weijia Lu, Xiaodong Zhang, Zhifei Yang, Xiaofeng Ma, Chuang Liu and Wangchen Lin
 2023  CN 116822619 A  [Link](#)

A Method for Automatic Capacity Allocation (◇)

 Shuyu Jiang, Weijia Lu, Na Li, Huan Ge and Bingyang Li
 2023  CN 116384669 A  [Link](#)

About: Automatic production line allocation using linear programming and cbc solver. AI for Scheduling.

A Power Battery Balancing Controller, Balancing Control Method, and Electric Vehicle (♠♠♠)

 Chuang Liu, Xichun Ke, Zhifei Yang, Weijia Lu, Xiaodong Zhang and Xiang Di
 2023  CN 116674432 A  [Link](#)

About: A heuristic strategy for battery balancing. In nowadays, heterogenization of power battery cells becomes a critical factor of e-car lifespan. Certain chip has been provided to automatically initiate balancing process and ultimately ameliorate the heterogenization. But the chip will shutdown balancing once the temperature reaches a pre-set threshold. So this patent introduce a method to fulfilled balancing process without trigger the temperature protection strategy. AI for Control.

A Reinforcement Learning-based Battery Balancing Method and Device (♠♠)

 Zhifei Yang, Xichun Ke, Chuang Liu, Weijia Lu, Xiaodong Zhang and Xiang Di
 2023  CN 116767024 A  [Link](#)

About: The reinformant learning verion of CN 116674432 A. Moreover this patent reports the method to establish the digital twin model of the balancing hardware. This digital model is used as the environment during policy training. AI for Control.

A Curve Information Processing Method, Device, Storage Medium, and Detection Equipment (♠)

 Peng Liu, Lin Sun, Weijia Lu and Tong Ma
 2023  CN 115631139 A  [Link](#)

About: AI for Manufacturing.

A Target Detection Method, Device, Storage Medium, Sensor, and Controller (♠♠♠)

 2024  CN 118860853 A  [Link](#)

About: A test case generation tool utilizing signal matrix, IO configuration and large language model. LLM for Software Development.

A Method for Model Data Processing, a Simulation Apparatus, a Storage Medium, and a Testing System. (♠♠♠)

 Zhifei Yang, Xiaofeng Ma, Weijia Lu, Xiaodong Zhang, Wangchen Lin, Ting Li, Fei Sun, Qiang Fang and Gang Xi
 2024  CN 118732531 A  [Link](#)

About: A method to establish digital twin model based on a new neural ODE structure. AI for Plant Modeling.

Scenario-Aware Clustered Federated Learning for Vehicle Trajectory Prediction with Non-IID Data (♠)

 Liang Tao, Yangguang Cui, Xiaodong Zhang, Wenfeng Shen, Weijia Lu
 2024  Part D: Journal of Automobile Engineering (PartD)  [Link](#)

About: A vehicle trajectory model, federated learned from real vehicle data, with multi-head design and federated clustering. The corresponding method is protected in patent CN 116822619 A. Federated Learning in Vehicle.

A Comfortable and Robust DRL-based Car-following Policy Incorporating Lateral Information under Cut-in Scenarios (♠♠♠)

Yifei Shen, Zhifei Yang, **Weijia Lu**, Wenfeng Shen, Zhou Lei
2024 in Proceedings of 35th IEEE Intelligent Vehicles Symposium (IV) [Link](#)
About: A reinforcement learning policy to significant increase the safety. The vehicle trajectory model, federated learned from real vehicle data and reported in PartD 2024, provide critical lateral information. AI for Control. A reinforcement learning policy to significant increase the safety. The vehicle trajectory model, federated learned from real vehicle data and reported in PartD 2024, provide critical lateral information. AI for Control.

Improving Generalization and Personalization in Long-Tailed Federated Learning via Classifier Retraining (♠♠)

Yuhang Li, Liu Tong, Wenfeng Shen, Yangguang Cui, **Weijia Lu**
2024 in Proceedings of 30th International European Conference on Parallel and Distributed Computing (Euro-par) [Link](#)
About: A resampling strategy to address heterogenization issue of data distribution in a federated learning. Federated Learning in Vehicle. A resampling strategy to address heterogenization issue of data distribution in a federated learning. Federated Learning in Vehicle.

Addressing Sim2Real Challenges in DRL-based Car-following Policies via Federated Reinforcement Learning and Augmented State Observations (♠)

Yifei Shen, Zhifei Yang, **Weijia Lu**, Wenfeng Shen, Xiaodong Zhang, Xiaofeng Ma
2024 Proceedings of the 2024 International Conference on Intelligent Driving and Smart Transportation [Link](#)

Hybrid Attention with Memory-based Conditional Refinement for Unified Intent Trajectory Prediction (♠♠♠)

Jingjing Wang, **Weijia Lu**, Wenfeng Shen, Yangguang Cui, Tong Liu, Xiaodong Zhang, Zhifei Yang, Guangtai Ding, Yifei Shen, Liang Tao
2025 Transportation Research Record (TRR) [Link](#)
About: A spatiotemporal network with semantic-search based training method. To improve the prediction of driver intention. AI for smart sensor. A spatiotemporal network with semantic-search based training method. To improve the prediction of driver intention. AI for smart sensor.

FedSMU: Communication-Efficient and Generalization-Enhanced Federated Learning through Symbolic Model Updates (♠♠♠)

Xinyi Lu, Hao Zhang, Chenglin Li, **Weijia Lu**, ZHIFEI YANG, Wenrui Dai, xiaodong Zhang, Xiaofeng Ma, Can Zhang, Junni Zou, Hongkai Xiong
2025 International Conference on Machine Learning (ICML) '25 [Link](#)
About: Alleviating data heterogeneity by symbolizing client model updates (normalizing parameter magnitude) and combining Lion optimizer's local-global operations reduces communication costs and enhances the global model's generalization. Alleviating data heterogeneity by symbolizing client model updates (normalizing parameter magnitude) and combining Lion optimizer's local-global operations reduces communication costs and enhances the global model's generalization.

LBi-FL: Low-Bit Integerized Federated Learning with Temporally Dynamic Bit-Width Allocation (♠♠♠)

Li Ding, Hao Zhang, Wenrui Dai, Chenglin Li, **Weijia Lu**, ZHIFEI YANG, xiaodong Zhang, Xiaofeng Ma, Junni Zou, Hongkai Xiong
2025 International Conference on Machine Learning (ICML) '25 [Link](#)
About: By using low-bit quantization and dynamic bit-width allocation via reinforcement learning, communication and computation costs are significantly reduced while maintaining high precision. By using low-bit quantization and dynamic bit-width allocation via reinforcement learning, communication and computation costs are significantly reduced while maintaining high precision.

Logical Consistency is Vital: Neural-Symbolic Information Retrieval for Negative-Constraint Queries (♠♠♠)

Ganlin Xu, Zhoujia Zhang, Wangyi Mei, Jiaqing Liang, **Weijia Lu**, xiaodong Zhang, ZHIFEI YANG, Xiaofeng Ma, Yanghua Xiao, Deqing Yang
2025 The 63rd Annual Meeting of the Association for Computational Linguistics (ACL) [Link](#)
About: A neuro-symbolic info retrieval method using first-order logic to boost complex query retrieval. A neuro-symbolic info retrieval method using first-order logic to boost complex query retrieval.
